Political Alienation among Youth at Universities

*Alaa Z. Al-Rwashdeh**

ABSTRACT

This survey aims at explaining the most important reasons which lead to the political alienation for the young and the most important results of this kind of alienation. To achieve the aims of this survey a sample of 393 male and female students was chosen from the humanity and science facilities for the acadenuc year 2009/2010. The survey reached the following results :there are statistical differences due to faculty, family income variables of political alienation, its results and suggested solutions; there are also statistical differences due to sex variable of political allienation and its suggested solutions. It is recommended to spread cultural challenge, to develop the programmes of parties, encourage students for political participation, to enhance the political awareness among young, and to open discussion of political matters.

Keywords: Alienation, Political Alienation, Youth at Universities.
